FEBRUARY, 2003 The First Issue

FPP was presented to  
the Pope John II.  
And,  
what happened...?

## FPP Presented to the Pope John II

The Pope John II has been very active for more than 23 years, traveling abroad more than 100 times and called "the flying pope". However, he is now 83 years old and suffering from Parkinson's disease more seriously. So there has been a big concern about his health to continue his hard work as pope, and the media have mentioned his possible retirement for the first time in more than 800 years.

In June 2002, Prof. Luc Montagnier (HIV discoverer, President of World Foundation Aids Research and Prevention) handed FPP directly to the Pope at the Vatican and recommended treatment for health recovery. It became top news in Italian newspapers.

Prof. Montagnier's audience with the Pope in June 23, 2002

Montagnier dona al Papa le pillole della giovinezza

Message for the first issue...

It has been one year since FPP was released simultaneously in Europe, U.S.A. and Japan in March last year in response to the requests from many scientists who were involved with FPP researches in U.S.A. and Europe to start selling FPP as soon as possible in order to support human health and reduce medical costs.

We use non-genetically-modified papayas as ingredients and produce FPP, which is fermented food, at the factory certified with ISO 9001 (quality control) and ISO 14001 (Environmental management) to ensure consistent product quality.

FPP is highly appreciated around the world with the scientific evidences as well as the quality control under ISO9001 and ISO14001, and sells at pharmacies in France.

Yukiyasu Hayashi

We are now in plum blossom season. In contrast to spectacular cherry blossom, there is another beauty in plum blossom, so called "Wabi-sabi (beauty of rustic simplicity)". Plum trees bear fruits in every spring. We would like to bear fruit of "FPP" like plum tree, and transmit this news to you all.

## Was it a miracle? What was the secret of the pope's foreign trips in July!?

From July 23, the Pope John II visit Canada, Guatemala and Mexico. At the Toronto airport, he was seen to walk on his feet and descended the stairs of his airplane, which was a big surprise for all.

It became top news in TV and newspapers and they called his health recovery "miracle" especially in Europe. The media started to try to find the secret of the pope. The French newspaper "LE FIGARO" reported the news of pope's Toronto visit on their front page, saying "What is the new treatment of the Pope?" ®

Mais qui souffrant de la maladie de Parkinson et d'Alzheimer, Jean-Paul II, qu'on appelle également l'aristote de Dieu, a encore révélé ce mot-clé, malgré l'opposition de l'Eglise et le malentendu, de ses supposés amis, de son frère, de son père et de ses amis en Pologne. Certes à la mort de son père il a déclaré : « Je suis devenue chrétienne, rentrée au Vatican grâce à Dieu et à deux nouvelles personnes, une personne et une personne qui m'aide à faire des personnes. Des personnes qui viennent et s'apportent à la dimension humaine de l'homme ». Mais il a également écrit que « au cœur de son individualité méridionale poussait toujours à la croix, n'osera jamais de lui faire prendre chaque jour pour plus de 11 heures, au sol l'herbe et la poussière, mais qu'il a été sauvé par l'amour de Dieu et que l'amour de Dieu va entraîner à pas de géant les problèmes du siècle en Afrique, mais aussi dans le royaume myriathénique que plusieurs millions de confirment en rés-

## **Le remède secret du pape arrive en France !**

SANTÉ. Cet été, Jean-Paul II a paru aller mieux, à Toronto puis en Pologne. Grâce notamment, selon certains, à un remède à base de papaye, jusqu'ici inconnu en Europe. Cette semaine, le pape doit arriver en France. Suscitant beaucoup d'espoir...

⑧ Aujourd'hui en France (France) issued on September 24, 2002

"We are so impressed with the health recovery of the pope after the treatment for a few weeks. This is a product to protect our health," said Prof. Marc Weksler of New York Cornell University.

"What is the effect of Fermented Papaya Preparation?  
...it is immune enhancement, antioxidant, and cell's anti-aging..."

rennes des cellules. Elle ferait la peau à Parkinson, Alzheimer et certains cancers.

Il y a quelques semaines, dans cette même encyclopédie, on rapportait que l'ingrédient actif dans les jus de fruits était l'acide chlorogénique. Pour le papaya, malheureusement, tout ce qui fait de nous une usine à bulles. Mais, comme il n'a pas de bulles, il faut faire autre chose. Parce que pour le papaya, puisque il doit être flambéé il y a une autre substance, tenu secrète par, devinez ? les fabricants de papaya. C'est une bulle jaune orangé, de forme oblongue : « ces papayes douces ressent au début des vertus curatives », coupe le docteur Charles, « mais au final plus que de ses illets, mon dictionnaire des citations étant un peu cliché en citations. »

Le Pr Luc Montagnier, celui qui déchiffra le virus du sida, estime que le papaya peut servir vers la retraite, mais que la recherche américaine rattrape par le col de sa chemise blanche, Luc Montagnier, dans son bureau de l'hôpital pour tchatcher préférait dans la tierra-mendre, voyant l'attendue de la faiblesse papale. La Parapharmacie, c'est à dire la pharmacie à emporter, offre un traitement bien moins cher et sans副作用.

## FPP sells at Dispensing Pharmacies in France

FPP sells under a trade name of "Immun'Âge" in France.

It sells at dispensing pharmacies in France as a scientifically validated supplement to enhance immune system for anti-aging, recommended by Prof. Luc Montagnier, who is well-known in France as a HIV-discoverer.

Although FPP is not a medicine but a food, it is studied by well-known scientists and doctors in Europe and U.S.A. and has

scientific evidences to prove its effects. Moreover, FPP is manufactured by the factory in Japan, certified with ISO9001 and ISO14001. The strict quality control and environmental management are highly valued and it sells at dispensing pharmacies in France, which is the first time as a food supplement. Since FPP received lots of media exposures, it is displayed prominently at the pharmacies in central Paris.

## FPP ISO9001 and ISO14001

The manufacturer of FPP has been certified with both ISO9001 and ISO14001 for the first time as a food supplement maker.

In addition to the scientific evidences proved by well-known scientists and doctors in Europe and U.S.A., the quality of the product with transparent manufacture process is highly valued internationally.
