

FPP Book Published in Italy

Ms. Margherita Enrico, a famous Italian journalist, and Dr. Pierre Mantello, the director of the Osato Research Institute; published a new book on FPP called The Papaya: An Alliance in Health. In Milan, Italy on September 19, 2006, 30 journalists and more than 200 celebrities attended a press conference for the book. Various newspapers covered the press conference, as well as several major Italian television networks, including the “TG5 Evening News” which included an interview with Ms. Enrico.

She wrote about how to age in a graceful and healthy way, how to stay fit, and how to use FPP as a dietary supplement. Ms. Enrico also wrote about the relation of oxidative stress to the immune system in the world of sports, frequently quoting some famous professional athletes.

Racecar drivers suffer from extreme stress and fatigue since even the slightest mistake can end their lives.

We would like to introduce two famous racecar drivers: first, Mr. Jean Alesi, a former Formula 1 driver; and second, Mr. Philippe Gache, a team owner and driver of the SMG buggy in the Dakar Rally.

Mr. Alesi explains: “As a professional athlete, I have been paying the closest attention to my own lifestyle and daily diet. I knew that excessive sports activity can cause active oxygen. My friend, Philippe Gache, recommended to me an antioxidant dietary

supplement called FPP, so I started taking it. In one week I started feeling less tired. I still take it regularly and I don’t get the flu anymore which I used to suffer from quite often. Also, it has become easier for me to overcome stress, both mentally and physically.”

Mr. Gache states: “For the 2005 Dakar Rally, I started taking FPP eight weeks before the race. I felt less tired during the intensive training and did not suffer from colds as I usually did. During the race, I slept well every night and did not feel as much physical fatigue as before. After the race, I readjusted to the rhythm of daily life easily thanks to FPP. I wish I could have found FPP sooner.”

The comments of these professional racecar drivers show that FPP is useful in the world of sports. In the past, we were only able to get

Ms. Margherita Enrico press conference in Milan

precise data from blood sampling tests, but nowadays new research methods using saliva as a parameter are in progress and make testing easier. We expect FPP to soon become popular in the world of sports.

Mr. Philippe Gache

Team SMG *IMMUN'AGE* Buggy Finishes 12th in 2006 Dakar Rally

In the 2006 Paris-Dakar Rally, the Team SMG *IMMUN'AGE* buggy driven by Mr. Philippe Gache, a leading French off-road racer, finished in 12th place despite intense competition from factory-sponsored teams. The Paris-Dakar Rally is the most demanding race in the world.

It lasts a total of two weeks, beginning on January 1. One month before the start of the race, Mr. Gache started taking *IMMUN'AGE* every day during his training which helped him to get in shape and also to recover from physical fatigue during the race. He said that he owed the team’s satisfying result to *IMMUN'AGE*.

IMMUN'AGE ASTON MARTIN V8 VANTAGE Finishes 8th in 24-hour Race of Bahrain

From December 15-16, 2006, the IMMUN'AGE Aston Martin V8 Vantage and the Vantage N24 competed in the 24-hour endurance race of Bahrain in the Persian Gulf at the Bahrain International Circuit. The Aston Martin Works Team

finished the race in eighth place overall in the stock car racing category. Both the drivers and work crews, consisting of Britons and Germans, took IMMUN'AGE during the test driving in preparation for the

demanding race. They recovered from the daily physical fatigue before the race more easily, and were thus able to compete in peak condition. They continued taking IMMUN'AGE during the race and finished without any accidents or injuries.

ASTON MARTIN DBR9 GT1 Class Finishes 2nd at Le Mans with IMMUN'AGE Support

The Aston Martin Racing Team participated in the 24 Hours of Le Mans, the most famous sports-car endurance race in the world which has been held annually for 100 years. In the June 19, 2006 race, the team performed very well and finished in second and fifth places in the GT1 Class, sixth and tenth places overall. The Osato Research Institute supports the health of the drivers of the Aston Martin Racing Team as a technical partner. Racecar drivers suffer from intensely high oxidative stress both before and during races. Therefore it is worth conducting clinical tests on them from the point of view of the relationship between oxidative stress

and sports activity. We hope that the results of our clinical tests will contribute to the drivers' increased safety in upcoming races.

IMMUN'AGE FERRARI 360 Wins GT Race on FERRARI Day

On October 29, 2006, Ferrari Day, a special event for Ferrari fans, was held at the Monza Circuit in Italy. The IMMUN'AGE Ferrari 360 participated in the GT race and won

the 360 World Championship. The driver, Mr. Lorenzo Bontempelli, had been taking IMMUN'AGE and was in the best condition on the day of the race.

Mr. Bontempelli said that IMMUN'AGE helps him recover from stress and physical fatigue. He shared the joy of victory with the staff of Osato International.

Bicycle Charity Race for Children with Cancer All-Sport 2006: "Little Hearts"

On May 7, 2006, a bicycle charity race for children with cancer was held in the mountains of Ussets, about a one-hour drive from Valence in the South of France. This annual race began 10 years ago and becomes more popular every year. Osato International has been supporting

this charity race for three years. We provide all the participants with IMMUN'AGE in order to improve their health and to help them recover from physical fatigue. On the day of the race, unfortunately it rained slightly, but all the participants started successfully after Mr. Hayashi (President of Osato International)

fired the starter's gun. Osato International donated all the proceeds from this charity race to the Childhood Cancer Center at Lyon University. Osato International will continue to make contributions to society through such charitable activities.

Prof. Phillippe, a director of the Lyon University Hospital also joined the race

All the participants received a blue jacket with Immun'Age logo and it was useful for the rainy weather

2006 Health Exposition

The 2006 Health Exposition occurred at the "Big Site" in Tokyo from March 22-24. Osato International set up a booth and made a presentation. The Health Exposition is one of the largest trade shows in this field in Japan and in its 24th year drew 48,533 participants as well as 560 companies. Dr. Pierre Mantello, MD, the director of the Osato Research Institute, presented a health seminar and explained the function of FPP by showing the results of the research studies performed up until now.

The healthcare industry has been attracting people's attention recently. Nowadays people need authentic safety and high quality care from the big-business healthcare companies.

at the ORI, translated it into Japanese. The participants seemed to enjoy this style of lecture. Afterwards, many people eagerly asked questions at the booth.

The combination of the booth and the presentation appealed to the participants who were interested in learning more. Dr. Mantello gave a lecture in English and Ms. Yoshida, a researcher

We received many questions from keen eager visitors at the booth

NEO RIVER (IMMUN'AGE Factory) Receives ISO 22000 Certification

"Food safety" has been an essential factor in order for us to lead healthy and comfortable lives. It can be said that human history is a history of the effort to manage food risks. Nowadays, owing to the rapid progress of globalization, we see many foods in the market from all over the world. However, the current management of food risks for these types of international food businesses does not seem to be enough. In Japan recently, there are many news stories about the poor management of large, famous food companies. More and more consumers are seeking for "safe and trustworthy" foods.

IMMUN'AGE is manufactured under strict quality control at the Neo River factory which has certifications of ISO 9001 (International Standard for Quality Management Control), and ISO 14001 (International Standard for Environmental Responsibility). In February 2007, Neo River received ISO 22000 Certification for Food Safety Management which only a handful of companies have received in Japan up until now. We believe that these ISO certifications exemplify the company policy of IMMUN'AGE: high quality, food safety, and environmental responsibility.

IMMUN'AGE is becoming more and more popular, not only in Japan, but also internationally. Osato International has distribution bases in the United States and Europe. In France and Italy, IMMUN'AGE is sold in pharmacies and is renowned as an effective healthcare product.

Free Yoshihiro Ota CD for First 30 Respondents

Chanel chose Mr. Yoshihiro Ota, a talented pianist, for the young artist support program at "Chanel Pygmalion Days" in 2006. Mrs. Toshiko Hayashi of the Osato Research Institute produced his CD. The play-list features "Hungarian Dance, Numbers 1-10" and "Intermezzi." "Hungarian Dance, Number 5" is famous for being used in Charlie Chaplin's movie,

"The Great Dictator," in the very humorous scene when a barber shaves a customer's face. The light touch of the music makes one feel like dancing. On the other hand, "Intermezzi," is a beautiful song with a melancholic tone. Each note of Mr. Ota's piano playing sounds very touching. The first 30 people to respond to this newsletter will win a copy of Mr. Ota's new CD.

Please send your name, age, with a post card indicating you would like to have Ota CD and address to Osato International, Inc. The winners will receive their CDs without prior notification.

"Pygmalion" comes from Greek Myth and means a man who believes the talents of artists and support them to let them blossom. SHANEL supports young artists with the spirit of the founder of SHANEL who supported Pablo Picasso, Igor Stravinsky, Raymond Radiguet, Luchino Visconti, Jean Cocteau when they were still not famous and was called their "Pygmalion" (from SHANEL HP)
